

PROCEEDINGS of the **Small Systems Simulation Symposium 2000**

**4.-5. September
Faculty of Electronic Engineering
Niš, Yugoslavia**

**organized by
Yugoslav Simulation Society
and**

**Faculty of Electronic Engineering,
Niš, Yugoslavia**

Programme Committee:

E. Bushehri, Univ. of Middlesex (UK)
R. Damper, Univ. of Southampton (UK)
H. Detter, TU Vienna (Austria)
M. Lenczner, Univ. Franche-Comté (France)
V. Litovski, Univ. of Niš (Yugoslavia)
Z. Nikolić, Univ. of Niš (Yugoslavia)
M. Popović, Univ. of Belgrade (Yugoslavia)
N. Stojadinović, Univ. of Niš (Yugoslavia)
M. Zwolinski, Univ. of Southampton (UK)

Organizing Committee:

M. Damnjanović, Univ. of Niš (Yugoslavia)
M. Jevtić, Univ. of Niš (Yugoslavia)
T. Kazmierski, Univ. of Southampton (UK)
V. Litovski, Univ. of Niš (Yugoslavia)
S. Milenković, Univ. of Niš (Yugoslavia)
Ž. Mrčarica, Univ. of Niš (Yugoslavia)
P. Petković, Univ. of Niš (Yugoslavia)

Symposium Secretary:

Mr. Kristijan Zarković
Faculty of Electronic Engineering
Beogradska 14
18000 Niš, Yugoslavia
phone: +381 18 529321
fax: +381 18 46180
e-mail: ssss@yss.elfak.ni.ac.yu

Organized by:

YSS - Yugoslav Simulation Society
Faculty of Electronic Engineering, Niš

under the auspices of:

Federal Ministry of Science and Development of FRY and
Serbian Ministry of Science and Technology

Contents

Mijalković S., Delft University, The Netherlands <i>A New Finite Element Approach to Stress Analysis in Microfabrication Technology</i>	1-8
Nikolić Z., University of Niš, Yugoslavia <i>Simulaton of Intergranular Impedance as a Function of Diffuson Processes</i>	9-12
Jakovljević. M., Technical University of Vienna, Austria <i>Electro-Thermal Simulation of Microsystems with Mixed Abstraction Modeling</i>	13-22
Kader M., Université de Franche-Comté, France <i>Distributed Control Based on Distributed Electronic Cicuits. Aplication to Vibration Control</i>	23-30
Damper R., University of Southampton, UK <i>The Hi-Noon Neural Simulator and its Applications</i>	31-36
Mrčarica Ž., University of Niš, Yugoslavia <i>Some Features of Analogue and Mixed-Signal HDL AleC++</i>	37-42
Ilić T., University of Niš, Yugoslavia <i>ANN Application in Modelling of Dynamic Linear Circuit</i>	43-48
Petković P., University of Niš, Yugoslavia <i>A Hierarchical Approach to Large Circuit Symbolic Simulation</i>	49-52
Petković P., University of Niš, Yugoslavia <i>A High Level Simulation for $\Delta\Sigma$ Modulator Design</i>	53-56
Živković V., University of Niš, Yugoslavia <i>An Object Oriented Approach to the Modelling of the Real-Time Systems</i>	57-62
Zwolinski M., University of Southampton,UK <i>A Technique for Transparent Fault Injection and Simulation in VHDL</i>	63-66
